

The brand of Western Lake Superior Sanitary District

Resource Renew has operated a reuse program at the Materials Recovery Center (MRC) for over twenty years. During that time, the program has undergone many changes to improve safety, efficiency, and effectiveness. The MRC Reuse Area is open – with changes to meet today’s safety needs.

If you visit the MRC with items to dispose of or recycle, you may briefly shop the Reuse Area. The Reuse Area is no longer open for casual “shopping”. We must focus on meeting the needs for disposal and recycling customers, while limiting customer contact and maintaining safety.

## **Shopping at the MRC Reuse Area**

### Who can shop?

- A customer already at the site dropping off items for disposal or recycling

### How does it work?

- Customers may select up to 2 reusable items per brief visit.
- Items in the Reuse Area are not to be dismantled. Customers must take items “as-is” in their entirety.
- Customers must sign and return liability waivers each time they visit. Return the waiver even if nothing is taken.

### Other Information:

- Customers may not approach other customers to request their materials for reuse.
- Customers may remove reusable items from the MRC in the designated Reuse Area only. Materials may not be removed from any other locations in the facility.
